One Earth event. Multiple physical views.

A common event link preserves what each record measures and how it was produced.

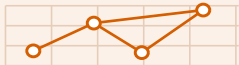
Observations

Waveforms, DAS, GNSS and hydrology

Simulations

Rupture, wavefields, physical settings

Impacts



Exposure, loss, modeled consequences

Agent tasks

Scientific workflows and evaluation tasks

EVENT-LINKED CORPUS

Event identity | Space-time support | Observed / derived / simulated

Retain physical meaning

Units, response, native sampling

Make evidence traceable

Uncertainty, provenance, transformations

Test scientific use

Comparability, transfer, abstention

CONCEPTUAL DRAFT | Oct 20, 2026 | Symbols illustrate design; no measured results.
